

Treasury Monthly Budget Report – November 2020

Summary

In November, the total net operating balance for the Government, including donor funds, was a surplus of VT 502.3 million. The year-to-date total net operating balance for the Government, including donor funds, at the end of November was a surplus of VT 8,430.1 million which is equal to 7.8 per cent of GDP.

The net operating balance of Government operations excluding donor funds in November was a surplus of VT 349.7 million. To date the total net operating balance for the Government operations, excluding donor funds recorded a surplus of VT 5,205.9 million, corresponding to 4.8 per cent of GDP.

Government operations excluding donor funds (VT million)

	November Forecast	November Actual	Year to date
<i>Revenue</i>	2,791.4	2,364.7	31,971.4
<i>Expenditure</i>	2,381.7	2,015.0	26,765.5
<i>Net operating balance</i> <i>(Revenue minus expense)</i>	409.7	349.7	5,205.9
<i>Net acquisition of</i> <i>Nonfinancial Assets</i>	193.6	132.0	1,038.1
<i>Net lending/borrowing</i> <i>(Net operating balance minus net acquisition of nonfinancial assets)</i>	216.1	217.7	4,167.8

Government Revenue

During November, Government revenue was VT 2,364.7 million which is 15.3 per cent lower than forecast (VT 2,791.4 million). This is mainly due to lower income from Value-Added Tax (VAT) this month. Total Government revenue to date in 2020 comes to VT 31,971.4 million, which comprises 98.0 per cent of the revised budget target (VT 32,632.5 million)¹ and is 1.03 per cent more than the VT 30,342.0 million that was collected during the corresponding period in 2019.

VAT remains the main source of the Government's taxation revenue, recording VT 375.4 million in November, which is 52.0 per cent less than forecast (VT 781.4 million). This is primarily due to the damage that COVID-19 has done to the economy, leading to lower consumption, through both direct means (with the lack of tourists who normally contribute to VAT) and indirect means (with the flow on effects of lower wages, higher unemployment and lower demand). However, revenue from VAT is expected to have been much lower without the implementation of the economic stimulus, increased consumption in the aftermath of TC Harold, commercial bank loans and VNPF loans for COVID-19 preparedness. This makes a total VAT collection of VT 6,124.9 million so far this year, which represents 66.8 per cent of the revised annual budget target (VT 9,171.5 million)² and 24.0 per cent less than the collections made during the first eleven months of 2019 (VT 8,054.8 million).

Taxes on international trade and transactions, constituting import and export duties, are the second largest source of the Government's taxation revenue, collecting VT 308.2 million in November, which is 1.5 per cent less than forecast

¹ Due to COVID-19, TC Harold and Tanna Ash Fall, DoFT has revised the annual 2020 budget to include budget support expected from development partners and revisions to expected revenue from individual taxes (such as VAT), fees (such as those from the Honorary Citizenship Programs) and charges.

² The budget for net VAT collections has been revised from VT 9,705.0 million to VT 9,171.5 million, which is the VAT expected to be received by the Government (VT 9,657.8 million) minus the VAT to be paid by the Government (VT 486.3 million). In the same way, the actual VAT collection so far this year of VT 6,124.9 million is the VAT received by the government (VT 7,030.1 million) minus the VAT paid by the government (VT 905.2 million).

(VT 312.9 million). This collection totals VT 2,881.4 million so far this year, which is 84.5 per cent of the budget target (VT 3,409.8 million)³ and 4.0 per cent less than the VT 3,001.8 million collected during the equivalent period in 2019. Excise tax collection was VT 310.4 million this month, 30.0 per cent more than forecast (VT 238.8 million), bringing the total so far this year to VT 2,419.8 million, which is 96.6 per cent of the budget target (VT 2,505.5 million) and is 6.2 per cent less than the VT 2,580.5 million collected by the end of November 2019.

In this time of dual crises for Vanuatu, development partners have disbursed a total of VT 3,102.6 million so far this year. If development partners agree additional budget support in future months, the budget and actuals figures will be updated. The Government continues to gratefully acknowledge the assistance of its development partners.

Among other revenue, constituting fees and charges, Vanuatu Development Support Program (VDSP) and Vanuatu Contribution Program (VCP) together collected VT 1,179.9 million in November, which is 6.5 per cent more than the forecast of VT 1,108.2 million. This makes a total of VT 13,069.9 million so far this year, which is 43.3 per cent more than the revised budget target of VT 9,120.3 million and is 17.8 per cent more than the VT 11,091.5 million collected in the same period a year ago.

Government Expenses

Government expenses during November was VT 2,015.0 million, which is 15.4 per cent less than forecast (VT 2,381.7 million). The majority of the underspending compared to forecast this month was due to spending on Subsistence Allowances, Land Survey Cost, General materials, Research & Development, Government Contributions, Electricity and Local Workshops being lower than forecast. Government expenses total VT 26,765.5 million so far in 2020, representing 78.4 per cent of the revised budget target (VT 34,130.6 million)⁴ and 17.3 per cent more than the VT 22,827.6 million that was recorded during the same period in 2019, primarily due to the extra spending related to the rollover of unspent funds and supplementary appropriation relating to COVID-19, policy stimulus and TC Harold relief and recovery response.

To date, Government expenses are controlled and in line with the budget target. However, there are some major overspent items which include:

- Acting allowances (VT 164.3 million against an annual budget of VT 83.0 million)
- Special allowances (VT 152.4 million against an annual budget of VT 8.5 million)
- Daily rated wages (VT 24.9 million against an annual budget of VT 10.6 million)
- Leave expenses (VT 76.4 million against zero annual budget)
- Overtime wages (VT 123.0 million against an annual budget of VT 75.9 million)
- Councillors' constituency allowances (VT 125.0 million against an annual budget of VT 85.9 million)
- Goodwill allowances (VT 116.1 million against an annual budget of VT 27.5 million)
- Equipment hire (VT 23.6 million against an annual budget of VT 12.6 million)
- Airports cleaning (VT 34.7 million against an annual budget of VT 19.8 million)
- Office materials (VT 34.9 million against an annual budget of 17.1 million)
- Office rental (VT 143.7 million against an annual budget of VT 117.5 million)
- Audit Fees (VT 13.7 million against an annual budget of VT 0.2 million)
- Official entertainment (VT 137.5 million against an annual budget of VT 115.9 million)
- Building repairs and maintenance (VT 268.1 million against an annual budget of VT 148.7 million)
- CBC road repairs and maintenance (VT 77.9 million against an annual budget of VT 28.1 million)

³ The category of Taxes on international trade and transactions was revised to include revenue from Asycuda import duties, which was categorised under 'Other revenue' before. The 2019 figures also include revenue from Asycuda, for better comparison.

⁴ The revised budget target includes some unspent funds from 2018 and 2019 that were rolled over to 2020 and the 2020 Supplementary appropriation. The supplementary appropriation also includes budget relating to COVID-19 and TC Harold State of emergencies and the Economic Stimulus Package.

- Houses repairs and maintenance (VT 43.1 million against an annual budget of VT 22.8 million)
- NCB road repairs and maintenance (VT 53.4 million against an annual budget of VT 4.7 million)
- Other suppliers (VT 79.9 million against an annual budget of VT 29.8 million)
- Rations suppliers (VT 257.9 million against an annual budget of VT 72.0 million)
- Lighting utilities (VT 166.5 million against an annual budget of VT 104.2 million)
- Sea Logistical costs (VT 240.0 million against an annual budget of VT 86.9 million)
- Volunteers' expenses (VT 15.0 million against zero annual budget)
- Donations abroad (VT 10.3 million against an annual budget of VT 0.7 million)
- Operating grant (VT 2,257.2 million against an annual budget of VT 2,056.0 million)
- Other Grants (VT 1,050.5 million against an annual budget of VT 247.0 million)
- Land compensation (VT 199.3 million against an annual budget of VT 180.0 million)

Government Acquisition of Non-Financial Assets

This month, the Government spent a net amount of VT 132.0 million on acquiring fixed assets, 31.8 per cent less than forecast (VT 193.6 million). To date, the Government has spent a net amount of VT 1,038.1 million on acquisitions of fixed assets, which is 41.4 per cent of the revised annual budget of VT 2,509.9 million⁵ and is 22.3 per cent more than what was spent in 2019 during the same period (VT 849.2 million). The main reason for the underspending compared to budget is Covid-19 and related border closures delaying major infrastructure work.

Government Transactions in Financial Assets and Liabilities

The Government's advance to Air Vanuatu so far this year totals VT 1,625.6 million as of the end of November.

The Government amortised VT 29.8 million worth of external loans and no domestic bonds in November. So far this year, the Government has amortised VT 2,417.0 million worth of external loans and VT 1,456.6 million worth of domestic debt. Issuances of domestic bonds total VT 3,875.6 million so far this year.

Development Budget Highlights⁶

In November, VT 450.4 million worth of project grants were received from development partners; this brings the total to date this year to VT 6,273.2 million, which is 67.6 per cent of the revised budget target (VT 9,283.4 million)⁷. Major donors contributing project grants so far this year include Australia (VT 2,052.0 million), the Asian Development Bank (ADB) (VT 1,313.4 million), the World Bank (VT 1,034.1 million), China (VT 469.3 million) and. Other contributing donors are gratefully acknowledged.

To date this year, donor funding expenses have totalled VT 3,049.1 million which is 32.8 per cent of the revised budget target (VT 9,305.8 million). Again, the main reason for this underspending is that Covid-19 has delayed planned projects.

⁵ See footnote 4. The budget for net acquisitions of fixed assets was further revised following the Government's decision to lend further money to Air Vanuatu. Some funds were taken out of the Infrastructure Development Fund and credited to the budget to lend domestically. This is shown under 'Net acquisition of financial assets – domestic' in the GFS tables at the end of this report.

⁶ DoFT is working on improving the collection of information regarding loan disbursements throughout the year, for inclusion in the monthly budget report.

⁷ The development financing revenue budget target has been revised to remove the Cat-DDO (which, as budget support, should be under Government financing) and the expenditure budget has been revised to include some unspent funds from 2018 and 2019 that were rolled over to 2020. This makes the budgeted expenditure greater than the revenue. Both revenue and expenditure budgets have been increased by the amounts of project grants promised by donors due to the States of Emergency supplementary.

- **Net operating balance** is equal to revenue minus expenses and indicates whether the government is able to sustain its current level of operations. The Government must aim for a surplus.
- **Net lending/borrowing** is equal to the net operating balance minus net acquisition of nonfinancial assets and is often referred to as the fiscal surplus/deficit. It indicates whether the Government is taking out resources from or giving resources to the economy.
- **Expense** is a decrease in net worth resulting from a transaction.
- **Revenue** is an increase in net worth resulting from a transaction.
- **VAT (Value Added Tax)** is the tax on goods or services collected in stages by enterprises but ultimately charged in full to the final purchasers.
- **Interest payments** and **Grants** are paid on fixed dates as they are payments to external Government entities.
- **Taxes on international trade and transactions** are almost all import duties based on Cost, Insurance, and Freight (CIF) values.
- **Excise** is charged on goods sold in the country regardless of whether they were produced domestically or overseas.
- In terms of revenue from development partners, **grants** are funds for donor-assisted projects provided by donors, held in the Government's central development fund account
- **General budget support** is a transfer from donors directly to the Vanuatu Government's national treasury account to finance the Government budget. Funds transferred as budget support are managed in accordance with the Government's normal budgeting and financial management process and there is relatively little specification as to expenditure purposes or priorities by donors.
- The **Government operations funded by donors'** numbers represent only revenue (in the form of grants) and expenses to and from the Government's central development fund account. Some donors continue to operate outside the Government system so these numbers understate the total value of donor support to Vanuatu.
- **Net acquisition of domestic financial assets** is positive when the Government accumulates cash reserves and negative when it draws down on its overdraft.
- **Net incurrence of domestic financial liabilities** is positive when Government bonds are raised through auction and negative when they are retired (paid out).
- **Net incurrence of external liabilities** is positive when the Government draws down external loans and negative when principal on these loans is repaid.
- **Compensation of employees** figures follow the Government paydays. The Government runs a fortnightly pay system.

Annex 1: Government Revenue Trend

In November, Government revenue collected was higher than the budget forecast figure predicted through cash flow analysis of previous fiscal years (Figure 1). This is mainly due to lower income from Value-Added Tax (VAT) this month.

Cumulative revenue flow (Figure 2) indicates robust revenue collections relative to the budget target.

Figure 1

Figure 2

Annex 2: Government Expenses Trend

Government expenses (excluding donor funds) for November were lower than the budget forecast figure predicted through cash flow analysis of previous fiscal years and taking current policies into account, as shown by Figure 3. The majority of the underspending compared to forecast this month was due to spending on Subsistence Allowances, Land Survey Cost, General materials, Research & Development, Government Contributions, Electricity and Local Workshops being lower than forecast.

The cumulative expenditure trend (Figure 4) shows that overall expenses are controlled and in line with the budget target.
